

MAKE

MONEY ONLINE

SIMPLY IN
THREE STEPS

Robert J

So, you are looking for extra
income?

You have heard that money is
being made by using the
internet.

So just how do you get some of
that money yourself?

Surely the first question you
should be asking is - “are there
real people actually making
money online?”

The short answer is YES!!

At the end of this brief report I have added a free report from BRAND 24 listing the Top 100 Internet Marketers so far this year.

There are 3 women in the Top 10 and many women in the top 100.

This works for everyone who follow the right steps.

Maybe you have already tried to make some money online but failed to see a penny or maybe had some income but just cannot seem to grow it into something useful.

You may be on the mailing lists of several Internet marketers who display their success with their big houses, flash cars and exotic holidays. But are you finding that their advice just leads to more confusion?

Some say “You must try things this way”, others say “You must try things this other way”. In the end you are just left confused as to which way to go.

I can let you into a secret!!

All the top marketers have started the same way and followed the same path!!

You see them now enjoying the success they have found. They have refined what they do and how they do it. (This is why you often feel that something is missing from their offering to you).

There are in fact just 3 steps to take – which **they** are still taking but when they offer you a product or service these 3 steps are being disguised as “some new training program”, or “some magic piece of software which will instantly bring you results”.

Maybe you are asked to come along to a weekend workshop costing thousands of dollars. Yes, you can gain much from hobnobbing with successful people.

But in essence they are just focusing you on improving one or more of the 3 steps. In the early days you are not yet ready for refinement. You just need to get the basics down and get them working for you.

Layer-upon-layer
One-step-at-a-time
Start-with-the-basics-and-work-up

This needs to be your approach. 95% of people who try Internet Marketing fail! WHY? When millions are being made by thousands of people?

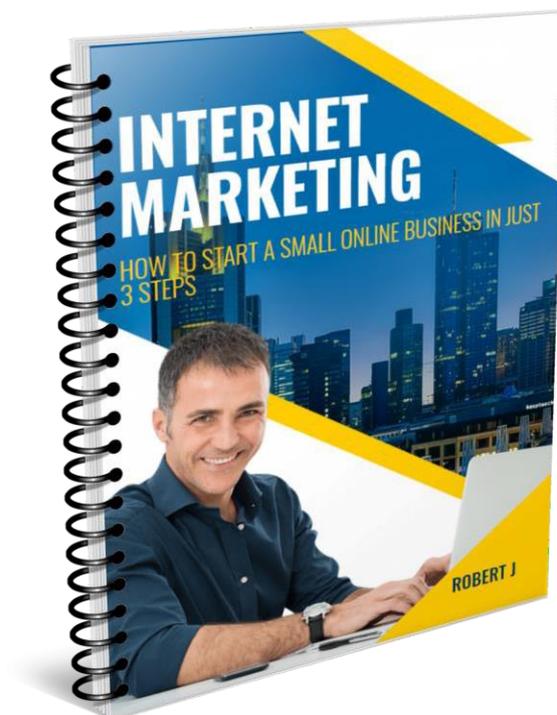

Answer – The ones who fail are not understanding or implementing the 3 steps. They are trying to cut corners and see instant success.

But if you research the back stories of the Top 100 people in the attached report, not one of them had “Instant Success” - NO SUCCESSFUL PERSON EVER DID.

One step at a time. FAIL many times and learn from those failures. Do things a little different next time, start to see some progress, build on that progress. [Cut your failure rate today by learning what others have already learnt. You don't need to reinvent the wheel! The Internet path to success has been found. You just need to follow it].

I hope this short report has given you encouragement that Yes there is money to be made online and Yes you too can be successful in getting some for yourself.

The 3 STEPS are detailed in the following e-book

So, Why Consider Internet Marketing?

Remember these words and phrases from 2020?

- Covid-19
- Coronavirus
- Lockdown

- Social Distancing

I am sure there will be many enquiries into the world wide reaction to the Covid-19 pandemic.

But one thing is for certain, the world wide economy has taken a hit like no other in history. Millions of workers around the world have lost their jobs.

No business has escaped the effects. In popular speak, even the ‘elite’ or the ‘wealthy’ have taken a massive hit as investments nose-dived into the dust. All those with shares in airlines, hotels, theme parks, holiday homes and other tourist assets as well as countless others have seen those investments reduced to rubble!

ILO: As job losses escalate, nearly half of global workforce at risk of losing livelihoods
The latest ILO data on the labour market impact of the COVID-19 pandemic reveals the devastating effect on workers in the informal economy and on hundreds of millions of enterprises worldwide.

Pension funds suffer record losses as Covid-19 hits
The average pension fund fell by 15 per cent in the first quarter of this year according to data from the latest Moneyfacts UK Personal Pension Trends Treasury report.

JUST 2 OF THE TOP HEADLINES COMING OUT IN APRIL 2020.

DID you get the first one? *Nearly 1/2 of the worldwide workforce will*

either lose their jobs or face an uncertain future.

THIS IS THE TIME!

TO ENSURE YOU HAVE SOME INCOME YOU NEED TO DO SOMETHING OTHER THAN SEEK REGULAR EMPLOYMENT. IT JUST WON'T BE THERE OR ELSE WILL BE UNRELIABLE.

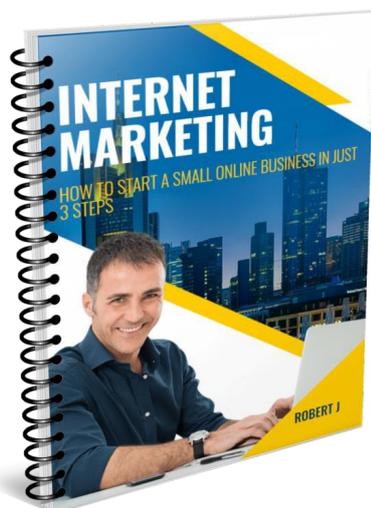

This where you can score big with Internet Marketing. (IM)

Simply put, IM is where people ask questions and you provide the answer. [If you don't know the answer yourself you can find out in so many ways and then pass that answer on. You will still be the person credited with providing the answer to your website visitors]. One challenge though, is to get visitors (*TRAFFIC*) to where your answer can be found.

In the past you could simply put up a website and Google would send you traffic. This is where the concept of SEO came in. Search Engine Optimisation is a technique of using *keywords* to tell Google and other search engines what questions you were providing answers to. This technique is no longer reliable. But there are other ways to get FREE AND PAID TRAFFIC to your websites etc.
